REVISED NOTICE OF PREPARATION

TO: Distribution List (Attached)

Lead Agency:

Agency Name: City of Santa Clarita
Street Address: 23920 Valencia Blvd, Suite 302
City/State/Zip: Santa Clarita, California 91355
Contact: James Chow
Associate Planner
Telephone: (661) 255-4330

Consulting Firm:

Name: Impact Sciences
Street Address: 803 Camarillo Street, Suite A
City/State/Zip: Camarillo, California 93012
Contact: Ms. Susan Tebo and Ms. Minta Schaefer
Telephone: EIR Project Managers (805) 437-1900

SUBJECT: Revised Notice of Preparation of Draft Environmental Impact Report for the Master’s College Master Plan and Tentative Tract Map 66503

The City of Santa Clarita will be the lead agency and will prepare an Environmental Impact Report (“EIR”) for The Master’s College Master Plan project, located east of San Fernando Road, north of Dockweiler Drive and Deputy Jake Way, and within the Placerita Canyon Community, in the City of Santa Clarita. The Project Applicant is The Master’s College, represented by Development Planning Services.

We need to know the views of your agency as to the scope and content of the environmental information, which is germane to your agency’s statutory responsibilities in connection with the proposed project. Your agency may need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The revised project description, location, and the probable environmental effects are contained in the attached materials. A copy of the Initial Study is attached. As indicated, the project description has changed. If this revision changes any of your previous comments, please respond with written comments within the time frame referenced below.

Due to the time limits mandated by State law, your response must be sent at the earliest possible date, but not later than 30 days after receipt of this notice. As such, the comment period for the Initial Study/Notice of Preparation begins on May 21, 2007 and ends on June 20, 2007. Please send your written response to James Chow at the address shown above. We would appreciate the name of a contact person in your agency.

Project Title: The Master’s College Master Plan; Master Case #04-496

Project Applicant: The Master’s College

Date: May 21, 2007

Title: James Chow, Associate Planner
Telephone: (661) 255-4330
Revised Initial Study
City of Santa Clarita

Project Title/Master Case Number: Master Case #04-496
Master Plan 07-001
General Plan Amendment 04-009;
Zone Change 04-006;
Tentative Tract Map 66503 (04-009);
Conditional Use Permit 04-031;
Ridgeline Alteration Permit 07-001;
Hillside Review 04-010; and
Oak Tree Permit 04-050

Lead Agency name and address: City of Santa Clarita
23920 Valencia Blvd., Suite 300
Santa Clarita, CA 91355

Contact person and phone number: James K. Chow
Associate Planner

Project location: The Master’s College
21726 Placerita Canyon Road
Santa Clarita, CA 91322

Applicant’s name and address: The Master’s College
Robert L. Hotton, Vice President for Operations
21726 Placerita Canyon Road
Santa Clarita, CA 91322

Project Site Assessor Parcel No. 2833-014-015, 021-024
2833-012-016, 17, 018
2833-013-020-024, 027, 029
2833-006-015-017
2834-027-057

General Plan designation: Residential Low (RL)
Private Education (PE)
Open Space (OS)

Zoning: Residential Low (RL)
Private Education (PE)
Open Space (OS)

PROJECT DESCRIPTION AND SETTING: This initial study has been prepared for the compilation and implementation of a Master Plan for the Master’s College, associated land use
designation amendments and tentative tract map for the creation of lots on land owned by The Master's College.

- A Master Plan is required in order to establish a procedure by which multiple uses and development for The Master's College campus can be evaluated, considered, and approved concurrently, thereby reducing processing time and uncertainty by eliminating the need for multiple entitlements to be obtained over the life of the development project. The Master Plan would serve as an implementing framework for the General Plan and the guide for The Master's College administration for all future campus improvements. The Master Plan provides a conceptual land use plan, regulations, guidelines and programs to ensure that the campus is developed in a manner consistent with the goals, objectives and policies of all stakeholders, including the College, the City and the community.

- A General Plan Amendment to the Land Use Element and to the Circulation Element is required for consistency between the proposed uses. The Land Use Element will be amended to change the land use designation of the area proposed for a multi-family residential development from PE (Private Education) to RM (Residential Moderate). In addition, the northernmost portion of the college campus, which is currently designated as RL and consists of classrooms, would be changed to PE for consistency with the existing land use. The Circulation Element will be amended with this application because it currently designates Dockweiler Drive as a six lane roadway. With this amendment, Dockweiler Drive would be designated as a four lane roadway. This is to limit grading on the ridge that the alignment of Dockweiler Drive traverses within the project area. Also, so the width is consistent with the current portion of the street to the east of the project area, and the reduction in width will also allow for a feasible and safe installation of the street due to the anticipated grade of the street.

- A Zone Change is needed to ensure the General Plan and zoning designations of the project area are consistent. Areas to be changed with this entitlement are the area that will be subdivided and developed for attached multi-family residential condominiums, currently zoned PE (Private Education). This area is proposed to be designated RM for consistency with the proposed attached residential use. The other area is currently zoned RL and the zone would change to PE because there are existing buildings on the site used by the college for instructional uses.

- The Tentative Tract Map is required for the creation of 54 attached condominium residential units for future development. The residential community will not be developed with this application, though the lots will be created and graded as part of this application. The earth will be used as part of the development of the future proposed entrance to the college, and the installation of the portion of Dockweiler Drive the applicant is responsible to install within the project area.

- The Hillside Review Permit is required for any site where the average cross slope of the property exceeds 10%. Also this proposal includes the movement of approximately one million cubic yards of earth for the development of the new entrance to the College, the installation of Dockweiler Drive on the project site and the grading for the proposed pads for the residential units.
A Conditional Use Permit is required because some of the proposed buildings at the college campus and the residential units exceed 35 feet in height and two stories. A CUP is also required for the importation of approximately 114,000 cubic yards of dirt.

The project site is within the City's Ridgeline Preservation Overlay Zone. The Ridgeline is located on the southwestern portion of the project site, in the location of the proposed Dockweiler Drive extension and main entrance to the college, and north of the tentative tract map. This Ridgeline will be altered with the installation of Dockweiler Drive extension, the construction of the tentative tract map, as well as the new entrance to the campus, known as The Hilltop Campus. The City’s UDC requires a Ridgeline Alteration Permit be submitted when a site is within this Overlay Zone and when 2/3 of the overall height of the Ridgeline would be impacted with grading and construction, as would be with the grading and development associated with this proposal.

An Oak Tree Permit is required because there are a substantial number of oak tree on or around the project area and surrounding parcels that would be impacted with the proposed renovations to the existing college facilities, the new entrance and proposed buildings on the campus, and the grading that would occur with the installation of Dockweiler Drive and the tentative tract map. These impacts include removals and encroachments, though no designated Heritage Oak trees will be removed with this proposal.

In addition, this proposal includes the movement of approximately 1.1 million cubic yards of earth for the installation of Dockweiler Drive, the development of the new entrance to the College, and the grading for the proposed pads for the attached multi-family units. In addition, the project would require the creation of a 1 acre detention basin on the project site in order to contain flood water. The detention basin would be designed to meet the requirements of the Los Angeles County Flood District.

**Setting**
The Master’s College campus is within the Community of Placerita Canyon in the City of Santa Clarita. This project area is located within the central portion of the City of Santa Clarita. Attached to this document is a Vicinity Map, Attachment A. This attachment highlights the contiguous properties in Placerita Canyon owned by The Master’s College that comprise the project area for this master plan.

Placerita Canyon is a rural portion of the City. There are two entrances to the community, one entrance on Sierra Highway, to the east of the project area and one entrance off of San Fernando Road, to the west of the project area. The entrance to the community on San Fernando Road is also used as the main entrance to the college. Many of the roads in the Placerita Canyon Community are not improved and are not maintained by the City of Santa Clarita. The residents and businesses within the Community of Placerita Canyon pay a fee to the Placerita Canyon Property Owners Association to maintain these roads.

At the time of this writing, the City’s Capital Improvements Division, Building and Engineering Department, is installing a backbone sewer along Placerita Canyon Road. The Master’s College
would hook up to when available. Most of the residences and other buildings in Placerita Canyon rely on septic tanks to service waste. As part of the installation of the backbone sewer, all existing buildings within 150 feet of the backbone are required to hook up to the backbone line within two years of the line’s installation. All new buildings constructed in Placerita Canyon would be required to hook up to the backbone line as a condition of the building permit.

The Master’s College
The Master’s College campus consists of contiguous parcels of land that total approximately 95-acres in size. The college operates as a full service campus with dormitories, administrative buildings, a baseball field, and instructional buildings on the campus. Development of the campus was approved in the 1970’s with a conditional use permit, and additional buildings have been added to the campus to this date. No Master Plan for the campus has been completed, though the college has requested entitlements for new development. Expansion of the campus has been issued for buildings such as the dorm at the western portion of the campus, and a new parking lot for the dorm. As a condition of approval for the dorm, the college was required to submit a master plan of the campus prior to any further land use entitlements issued for the college.

The College is situated within a rustic equestrian community, with uses that range from residential, a full-service movie studio, to a church and day care. The necessity for a master plan came from an environmental standpoint as development of future buildings and additions to existing buildings needs to be analyzed on a large scale and analysis cannot be piece-mealed. Also, residents of the Placerita Canyon Community requested a master plan of the campus be provided that would include a circulation plan, and population counts of the faculty and students. The goals of this master plan are to inventory existing buildings and uses on the campus, create a new main entrance to the campus, inventory proposed buildings on the campus and establish a student and faculty population cap.

Uses on the Site
The Master’s College houses the Master’s College campus, located on the 94.7-acre project area. The campus consists of multiple buildings and parcels with uses ranging from dormitories and administrative buildings, play fields.

Placerita Canyon Special Standards District
Section 17.16.080 of the City of Santa Clarita Unified Development Code is the Placerita Canyon Special Standards District. The character of Placerita Canyon is a rustic, equestrian community with low-density residential zoning (RL) located in the central portion of the City of Santa Clarita. The uses in Placerita Canyon include single-family residences, a full service motion picture studio (Melody Ranch, 15 acres), a mobile home park (Placerita Canyon Mobile Home Park, 3.5 acres), churches, a private school (Town and Country School), and The Master’s College (94.7-acre campus). The Placerita Canyon Special Standards District was established when the City incorporated and completed the first Unified Development Code and General Plan
in 1990. The community was established to maintain the equestrian and rural character of the community, and to set up development standards for future development in the community.

Sections in the Placerita Special Standards District include property development standards for residential development, non-residential development. These standards pertain to pedestrian and equestrian trails, improvements to the river bottoms, street trees and sewer.

**Biology**
The project site has numerous oak trees. The proposed development would impact these oak trees by removing or encroaching upon the trees during development. The applicant’s oak tree report would contain an inventory of the trees with mitigation for any impacts to the trees in compliance with the City’s Oak Tree Ordinance and Oak Tree Preservation Guidelines.

Newhall Creek is located on the project site, though south of the area to be developed with the new chapel and entrance, Dockweiler Drive, and the proposed subdivision and extension of Deputy Jake Drive. This creek would be improved as part of this development because included in the master plan is a bridge to cross the river to access the Community of Newhall.

**Grading and Site Preparation**
The portions of the project site are flat. These portions are within the Canyon and are currently developed with the campus. This site is within the Ridgeline Alteration Overlay Zone. There is a Ridgeline along the southern portion of the project site in the general area of the Dockweiler alignment, north of the tentative tract map, and at the new entrance to the campus. Approximately 1,100,000 cubic yards of earth movement would occur on the project site for the construction of the chapel, installation of Dockweiler Drive and to grade the pads of the proposed subdivision. The project would require the importation of approximately 114,000 cubic yards of dirt via an approved haul route.

**Water Service**
In order to serve the proposed project, the proposed project would necessitate the construction of one water tank located to the east of the project site. As a result of the project, the water service provider, Newhall County Water District, would require a 5.0 million gallon (MG) reservoir to replace the smaller (0.75 MG) of the two existing water tanks at the terminus of Dockweiler Drive. The 5.0 MG reservoir would be 32 feet in height and 168 feet in diameter. Other improvements like pipeline extensions, pump station upgrades, and grading would also be required. Grading to prepare the pad for the future reservoir would occur concurrently with the proposed grading for the project. However, construction of the infrastructure would occur in the future on an as-needed basis.

**Parking and Access**
There are 996 parking spaces on the campus used by the staff, guests, and students. These spaces are located on the site. As the new entrance to the campus is installed, new parking for approximately 265 spaces would be installed.
Other public agencies whose approval is required:
Los Angeles County Fire Department
Los Angeles County Health Department
Department of Fish and Game
Army Corps of Engineers

A. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Measures Incorporated" as indicated by the checklist on the following pages.

[X] Aesthetics [ ] Agriculture Resources [X] Air Quality
[X] Biological Resources [ ] Cultural Resources [X] Geology/Soils
[ ] Hazards & Hazardous Materials [X] Hydrology/Water Quality [X] Land Use/Planning
[X] Public Services [ ] Recreation [X] Transportation/Traffic
[X] Utilities/Service Systems [X] Mandatory Findings of Significance

B. DETERMINATION:

On the basis of this initial evaluation:

[ ] I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

[ ] I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

[X] I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Date 5/17/07
Date 5/17/07
C. EVALUATION OF ENVIRONMENTAL IMPACTS:

Potentially | Less Than | Less Than | No 
Significant | Significant | Significant Impact |
Impact | with | Impact 
Mitigation |

I. AESTHETICS - Would the project:

a) Have a substantial adverse effect on a scenic vista? [X] [ ] [ ] [ ]

b) Substantially damage scenic resources, including, but not limited to, primary/secondary ridgelines, trees, rock outcroppings, and historic buildings within a state scenic highway? [X] [ ] [ ] [ ]

c) Substantially degrade the existing visual character or quality of the site and its surroundings? [X] [ ] [ ] [ ]

d) Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area? [X] [ ] [ ] [ ]

e) Other ____________________________ [ ] [ ] [ ] [ ]

II. AGRICULTURE RESOURCES - In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? [ ] [ ] [ ] [X]

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? [ ] [ ] [ ] [X]
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?  

\[ \begin{array}{|c|c|c|c|c|}
\hline
& Potentially Significant & Less Than Significant & Significant Impact & No Significant Impact with Mitigation \\
\hline
\end{array} \]

\[ \begin{array}{|c|c|c|c|}
\hline
& [ ] & [ ] & [ ] & [X] \\
\hline
\end{array} \]

d) Other ____________________________  

\[ \begin{array}{|c|c|c|c|c|}
\hline
& [ ] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

III. AIR QUALITY - Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a) Conflict with or obstruct implementation of the applicable air quality plan?  

\[ \begin{array}{|c|c|c|c|}
\hline
& [X] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?  

\[ \begin{array}{|c|c|c|c|}
\hline
& [X] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors)?  

\[ \begin{array}{|c|c|c|c|}
\hline
& [X] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

d) Expose sensitive receptors to substantial pollutant concentrations?  

\[ \begin{array}{|c|c|c|c|c|}
\hline
& [X] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

e) Create objectionable odors affecting a substantial number of people?  

\[ \begin{array}{|c|c|c|c|}
\hline
& [X] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

f) Other ____________________________  

\[ \begin{array}{|c|c|c|c|}
\hline
& [ ] & [ ] & [ ] & [ ] \\
\hline
\end{array} \]

IV. BIOLOGICAL RESOURCES - Would the project:
| a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | [X] | [ ] | [ ] | [ ] |
| b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? | [X] | [ ] | [ ] | [ ] |
| c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | [X] | [ ] | [ ] | [ ] |
| d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? | [X] | [ ] | [ ] | [ ] |
| e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? Oak trees? | [X] | [ ] | [ ] | [ ] |
| f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | [X] | [ ] | [ ] | [ ] |
| g) Affect a Significant Ecological Area (SEA) or Significant Natural Area (SNA) as identified on the City of Santa Clarita ESA Delineation Map? | [ ] | [ ] | [ ] | [X] |
g) Other

V. CULTURAL RESOURCES - Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in '15064.5? [X]

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to '15064.5? [X]

c) Directly or indirectly destroy or impact a unique paleontological resource or site or unique geologic feature? [X]

d) Disturb any human remains, including those interred outside of formal cemeteries? [X]

e) Other: __________________________________ [X]

VI. GEOLOGY AND SOILS - Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. [X]

ii) Strong seismic ground shaking? [X]

i) Exposure of people to existing sources of potential health hazards (e.g. electrical transmission lines, gas lines, oil pipelines)? [X] [ ] [ ] [ ]

j) Other ______________________ [ ] [ ] [ ] [ ]

**VIII. HYDROLOGY AND WATER QUALITY - Would the project:**

a) Violate any water quality standards or waste discharge requirements? [X] [ ] [ ] [ ]

b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)? [ ] [ ] [ ] [X]

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site? [X] [ ] [ ] [ ]
| d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site? | [X] | [] | [] | [] |
| e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff? | [X] | [] | [] | [] |
| f) Otherwise substantially degrade water quality? | [] | [] | [] | [X] |
| g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? | [] | [] | [] | [X] |
| h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows? | [] | [] | [] | [X] |
| i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam? | [] | [] | [] | [X] |
| j) Inundation by seiche, tsunami, or mudflow? | [] | [] | [] | [X] |
| k) Changes in the rate of flow, currents, or the course and direction of surface water and/or groundwater? | [X] | [] | [] | [] |
| l) Other modification of a wash, channel creek or river? | [X] | [] | [] | [] |
| m) Impact Stormwater Management in any of the following ways: | [X] | [] | [] | [] |
i) Potential impact of project construction and project post-construction activity on storm water runoff?

ii) Potential discharges from areas for materials storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing), waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work areas?

iii) Significant environmentally harmful increase in the flow velocity or volume of storm water runoff?

iv) Significant and environmentally harmful increases in erosion of the project site or surrounding areas?

v) Storm water discharges that would significantly impair or contribute to the impairment of the beneficial uses of receiving waters or areas that provide water quality benefits (e.g. riparian corridors, wetlands, etc.)

vi) Cause harm to the biological integrity of drainage systems, watersheds, and/or water bodies?

vii) Does the proposed project include provisions for the separation, recycling, and reuse of materials both during construction and after project occupancy?

IX. LAND USE AND PLANNING - Would the project:
a) Disrupt or physically divide an established community (including a low-income or minority community)? [X]  [ ]  [ ]  [ ]

b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?  [ ]  [ ]  [ ]  [X]

c) Conflict with any applicable habitat conservation plan, natural community conservation plan, and/or policies by agencies with jurisdiction over the project?  [ ]  [ ]  [ ]  [X]

X. MINERAL AND ENERGY RESOURCES - Would the project:

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?  [ ]  [ ]  [ ]  [X]

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?  [ ]  [ ]  [ ]  [X]

c) Use nonrenewable resources in a wasteful and inefficient manner?  [ ]  [ ]  [ ]  [X]

XI. NOISE - Would the project result in:

a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? [X]  [ ]  [ ]  [ ]
b) Exposure of persons to or generation of excessive ground borne vibration or ground borne noise levels? [X] [] [] []

c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project? [X] [] [] []

d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project? [X] [] [] []

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? [] [] [] [X]

f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels? [] [] [] [X]

XII. POPULATION AND HOUSING - Would the project:

a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? [X] [] [] []

b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere (especially affordable housing)? [] [] [] [X]

c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere? [] [] [] [X]
XIII. PUBLIC SERVICES - Would the project result in:

a) Substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

   i) Fire protection? [X] [ ] [ ] [ ] [ ]
   ii) Police protection? [X] [ ] [ ] [ ] [ ]
   iii) Schools? [ ] [ ] [ ] [X]
   iv) Parks? [ ] [ ] [ ] [X]

XIV. RECREATION - Would the project:

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? [ ] [ ] [ ] [X]

b) Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? [X] [ ] [ ] [ ] [ ]

XV. TRANSPORTATION/TRAFFIC - Would the project:
a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?

[X]  [ ]  [ ]  [ ]  [ ]

b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?

[X]  [ ]  [ ]  [ ]  [ ]

c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

[X]  [ ]  [ ]  [ ]  [ ]

d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

[X]  [ ]  [ ]  [ ]  [ ]

e) Result in inadequate emergency access?

[X]  [ ]  [ ]  [ ]  [ ]

f) Result in inadequate parking capacity?

[X]  [ ]  [ ]  [ ]  [ ]

g) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?

[X]  [ ]  [ ]  [ ]  [ ]

h) Hazards or barriers for pedestrians or bicyclists?

[X]  [ ]  [ ]  [ ]  [ ]

XVI. UTILITIES AND SERVICE SYSTEMS - Would the project:

a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

[ ]  [ ]  [ ]  [X]

**XVII. MANDATORY FINDINGS OF SIGNIFICANCE:**
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

| [ ]                           | [ ]                                       | [X]                         | [ ]                   |

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

| [ ]                           | [ ]                                       | [ ]                         | [X]                   |

XVII. DEPARTMENT OF FISH AND GAME ‘DE MINIMUS’ FINDING

a) Will the project have an adverse effect either individually or cumulatively, on fish and wildlife resources? Wildlife shall be defined for the purpose of this question as “all wild animals, birds, plants, fish, amphibians, and related ecological communities, including the habitat upon which the wildlife depends for it’s continued viability.”

| [X]                           | [ ]                                       | [ ]                         | [ ]                   |
D. DISCUSSION OF ENVIRONMENTAL IMPACTS AND/OR EARLIER ANALYSIS:

<table>
<thead>
<tr>
<th>Section and Subsections</th>
<th>Evaluation of Impacts</th>
</tr>
</thead>
<tbody>
<tr>
<td>I. AESTHETICS</td>
<td>The project site includes vacant land on a Ridgeline and a 95-acre college campus known as The Master’s College. The project site is located adjacent to Dockweiler Drive, designated a Major Highway by the City’s General Plan. Placerita Canyon Road, Quigley Canyon, Meadview Avenue and Placeritos Boulevard are used to access the existing campus. The proposed new construction and entrance to the site would be located within the Ridgeline Preservation Overlay Zone, and would therefore, be visible from public view surrounding the site from the community of Newhall, and from San Fernando Road, Valle Del Oro, the Dockweiler Drive extension and Deputy Jake Way. In addition, the project would also necessitate the replacement of an existing 0.75 million gallon water tank with a larger 5 million gallon water tank at the same height of 32 feet. Due to the visibility of the project site, a potentially significant impact related to aesthetics could occur with the proposed development. Further review in the form of an environmental impact report is required to analyze aesthetic impacts anticipated with the proposed development.</td>
</tr>
<tr>
<td>II. AGRICULTURE RESOURCES</td>
<td>This development is to expand The Master’s College campus, construct 54 units associated with a Tentative Tract Map and extend Dockweiler Drive. The land to be developed with this application is located within the Ridgeline Preservation Overlay Zone. The project will have no agricultural impacts associated with the proposed development. The proposed development will not have an impact on Prime Farmland, Unique Farmland, Farmland, or Farmland of Statewide importance. The project site has not been mapped or monitored by the California Resources Agency. No impact is anticipated. The proposed Master Plan, Tentative Tract Map and extension of a General Plan Road will not conflict with existing zoning for agricultural use or a Williamson Act contract, as the site is within the Ridgeline Preservation Overlay Zone and portions of the project site have been developed with a college campus. No impact is anticipated.</td>
</tr>
<tr>
<td>III. AIR QUALITY</td>
<td>This proposal is to install a General Plan roadway, install a new entrance to a college campus, and subdivide and grade for 54 residential lots. Temporary air quality impacts include construction and site preparation. Long-term impacts include traffic generated by the proposal will include stationary and mobile sources. Substantial long-term and temporary impacts could occur with the project. Further review in the form of an environmental impact report is required to analyze potential impacts.</td>
</tr>
<tr>
<td>------------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>IV. BIOLOGICAL RESOURCES</td>
<td>Oak trees are on and around the project site. There is riparian habitat along Newhall Creek, which is located on the southern portion of the project site. Impacts to oak trees and possible impacts to the riparian habitat may occur with this proposal. Further review in the form of an environmental impact report is necessary to analyze potential impacts.</td>
</tr>
<tr>
<td>V. CULTURAL RESOURCES</td>
<td>No cultural resources have been identified on the project site. No impacts to cultural resources are anticipated.</td>
</tr>
<tr>
<td>VI. GEOLOGY AND SOILS</td>
<td>The project site is located within Placerita Canyon and within the City’s Ridgeline Preservation Overlay Zone. Earth movement is proposed to include the movement of 1,100,000 cubic yards of earth, which would be balanced on site. The project also proposes the importation of approximately 114,000 cubic yards of dirt via an approved haul route. The earth movement will take place at the top and base of a Ridgeline. There are sensitive receptors such as residences and schools within proximity to the proposed earth movement. Further analysis in the form of an environmental review is necessary to analyze potential impacts.</td>
</tr>
</tbody>
</table>
### VII. HAZARDS AND HAZARDOUS MATERIALS

This proposal is for a Master Plan of a 95-acre college campus, the installation of a General Plan road and the development of a tentative tract map for 54 residential units. It is not anticipated that uses involved would include the routine transport of hazardous waste and materials. Most of the site has been developed as a college campus and will continue to be used as one.

McGrath Elementary school, as well as Town and Country School are located in proximity to the project area. Though, normal use of the proposed development will not have an impact on surrounding uses, construction may have a temporary impact on the surrounding residences and schools. Further analysis, in the form of an EIR is needed to analyze potential impacts.

### VIII. HYDROLOGY AND WATER QUALITY

The proposed project will change drainage, as development would occur on a Ridgeline. Impermeable surfaces will be installed on the top of and at the base of the Ridgeline. Furthermore, a detention basin on site will be required as a mechanism to contain flood water. The applicant will be required to submit information on compliance with NPDES standards prior to issuance of a grading permit.

Further analysis in the form of an environmental impact report is required to analyze potential impacts.

### IX. LAND USE AND PLANNING

One portion of the existing college campus, developed with offices and classrooms, is currently designated Residential Low (RL). The applicant has requested to change to designation of this area Private Education (PE), as part of this application. This will amend the City’s zoning map and General Plan Land Use Element.

The application also includes the request to change the designation of a vacant parcel on the southern side of the project site from PE to Residential Moderate (RM). This will amend the zoning map and General Plan designation of the site. This designation change will allow the proposed subdivision and site preparation for 54 attached residential units.

The applicant is requesting approval of the change in designation of Dockweiler Road from Major Highway to Secondary Highway. This will amend the City’s General Plan Circulation Element. This will change the ultimate width of Dockweiler Drive from 118 feet to 92 feet.
Currently, the community of Placerita Canyon is bound by Ridgelines and is accessible from Placerita Canyon at San Fernando Road, and Placerita Canyon at Sierra Highway. The proposed project includes the installation of a new primary entrance to The Master’s College, from Dockweiler Drive. The new entrance and development around the entrance will move primary access to the college from Placerita Canyon to a new entrance on a ridgeline that defines the community of Placerita Canyon. This new entrance would only be accessible to students, staff and guests of the college and would be used by residents of Placerita Canyon during an emergency.

Further analysis in the form of an environmental impact report is necessary to determine the potential impacts of this development.

**X. MINERAL AND ENERGY RESOURCES**

| No impacts are anticipated to mineral and energy resources with the expansion project. |

There are no known mineral resources on the project site and there is no known mineral resource recovery site in the project area. The applicant is strongly encouraged to utilize green building methods, therefore, the proposed expansion will not use energy in a wasteful manner.

**XI. NOISE**

| This request is for the installation of a Secondary Highway, a new main entrance to a college campus, and the associated site preparation. It is anticipated that there will be a potentially significant impact related to the exposure of people to excessive groundborne vibration and groundborne noise levels as well as an increase in ambient noise levels in the project vicinity above levels existing without the project. Additional noise impacts related to the increase of vehicular traffic are anticipated and additional analysis in the form of an EIR is required. |

**XII. POPULATION AND HOUSING**

| This development will induce population growth, by creating 54 units for future development of residences, as well as new housing for students. This development would occur on vacant land, currently designated for residential and school uses. It has not been determined if this proposal will displace a substantial number of existing housing or people. |

Further review, in the form of an environmental impact report is necessary to analyze potential impacts from this proposal.

**XIII. PUBLIC SERVICES**

| This request includes the installation of a General Plan Secondary Highway, a new main entrance to a 95 acre college campus. The |
| XV. RECREATION | The project may have an impact on the use of the parks within the City of Santa Clarita. The application includes the improvement of area on a Ridgeline for college facilities including sports fields, trails and parkways on the campus. The project would dedicate the southern portion of the project site to the City for open space purposes, including the improved five-acre Creekview Park. Further analysis in the form of an environmental impact report is necessary to analyze potential impacts. |
| XV. TRANSPORTATION /TRAFFIC | The proposed project will cause an increase in traffic which may be substantial to the existing traffic load and capacity of the street system. The project site abuts the alignment of Dockweiler Drive and changes the primary access to The Master’s College from Placerita Canyon to Dockweiler Drive. This request also extends Deputy Jake from the existing residential neighborhood to the proposed 54 units and connects to Dockweiler Drive, at the new college main entrance. The applicant shall submit a traffic study that analyzes the impacts anticipated with the proposed development. The proposed project will have a potentially significant impact on the level of service standard established by the City on San Fernando Road, Dockweiler Drive, Sierra Highway, and Valle Del Oro. The proposed development would also increase hazards due to design features on the project site a result of the new secondary highway alignment and access to the college and residential development. The proposed project may also conflict with adopted policies, plans or programs supporting alternative transportation and may have a potentially substantial impact which would create hazards or barriers for pedestrians and bicyclists. The applicant is required to submit a pedestrian circulation analysis through the campus to the surrounding communities. Additional analysis in the form of an environmental impact report is required to analyze potentially impacts related to transportation and
| XVI. UTILITIES AND SERVICE SYSTEMS | The project would generate additional waste, as uses include residences, classrooms, offices and an auditorium. It is unknown if the project site is served by a landfill with sufficient permitted capacity to accommodate the project’s solid waste disposal needs. Further analysis, in the form of an environmental impacts report is necessary to analyze potentially significant impacts related to utilities and service systems. The project requires the preparation of a 610 Water Service Analysis by the local water purveyor due to its size. Further analysis in the form of an EIR is necessary to analyze potentially significant impacts related to water supply and availability. |
| XVII. MANDATORY FINDINGS OF SIGNIFICANCE | It is not know what types of impacts and mitigation occur as part of this project to complete a master plan for a 95-acre college campus, install a City of Santa Clarita General Plan Secondary Highway and develop a 54-unit residential neighborhood. This project is located in proximity to a natural water course and there are oak trees throughout the site that have potential to be impacted as part of this development. Further review, in the form of an EIR is necessary to analyze any potential impacts from this project. |
